

FULLSTACK DEVELOPER ROADMAP

SWIPE TO LEARN

✗ Make sure you like web development first! Be sure about what you want and then go for it.

✗ 1. HTML
2. CSS
CSS Framework (Bootstrap or Tailwind recommended)

✕ JavaScript

✕ Git/GitHub

✕ Choose a JS
framework:

-React

-Vue

-Angular

Learn a backend language:

PHP

Java

Python

C#

Ruby etc...

General knowledge of
computer networks,
http/https.

Good knowledge of API
use.

Databases:
RDBMS
No SQL
Graph

DevOps
-Infrastructure
-Automation
-Visualization

-  Implement what you learn
-  Build your first Web App

Build your professional
resume

Attend an Internship or
Apply for a job!

Keep Learning 🔍

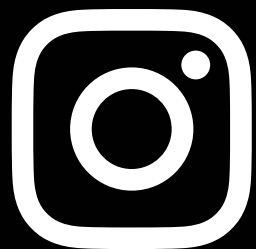

Along on your journey you might feel unmotivated and just wanna quit, but never forget why you started & everything will be worthy one day.
