

Creating a **Flutter Chatbot** in **3 lines** of code

Install Flutter Package

```
flutter pub add flutter_gemini_bot
```

Get Google Api key

Go on <https://ai.google.dev> and get
a google AI Api key for free

Use Package

```
List<ChatModel> chatList = []; // Your list of ChatModel objects
String apiKey = 'your_api_key';

FlutterGeminiChat(
  chatContext: 'example_context',
  chatList: chatList,

  apiKey: apiKey,
);
```

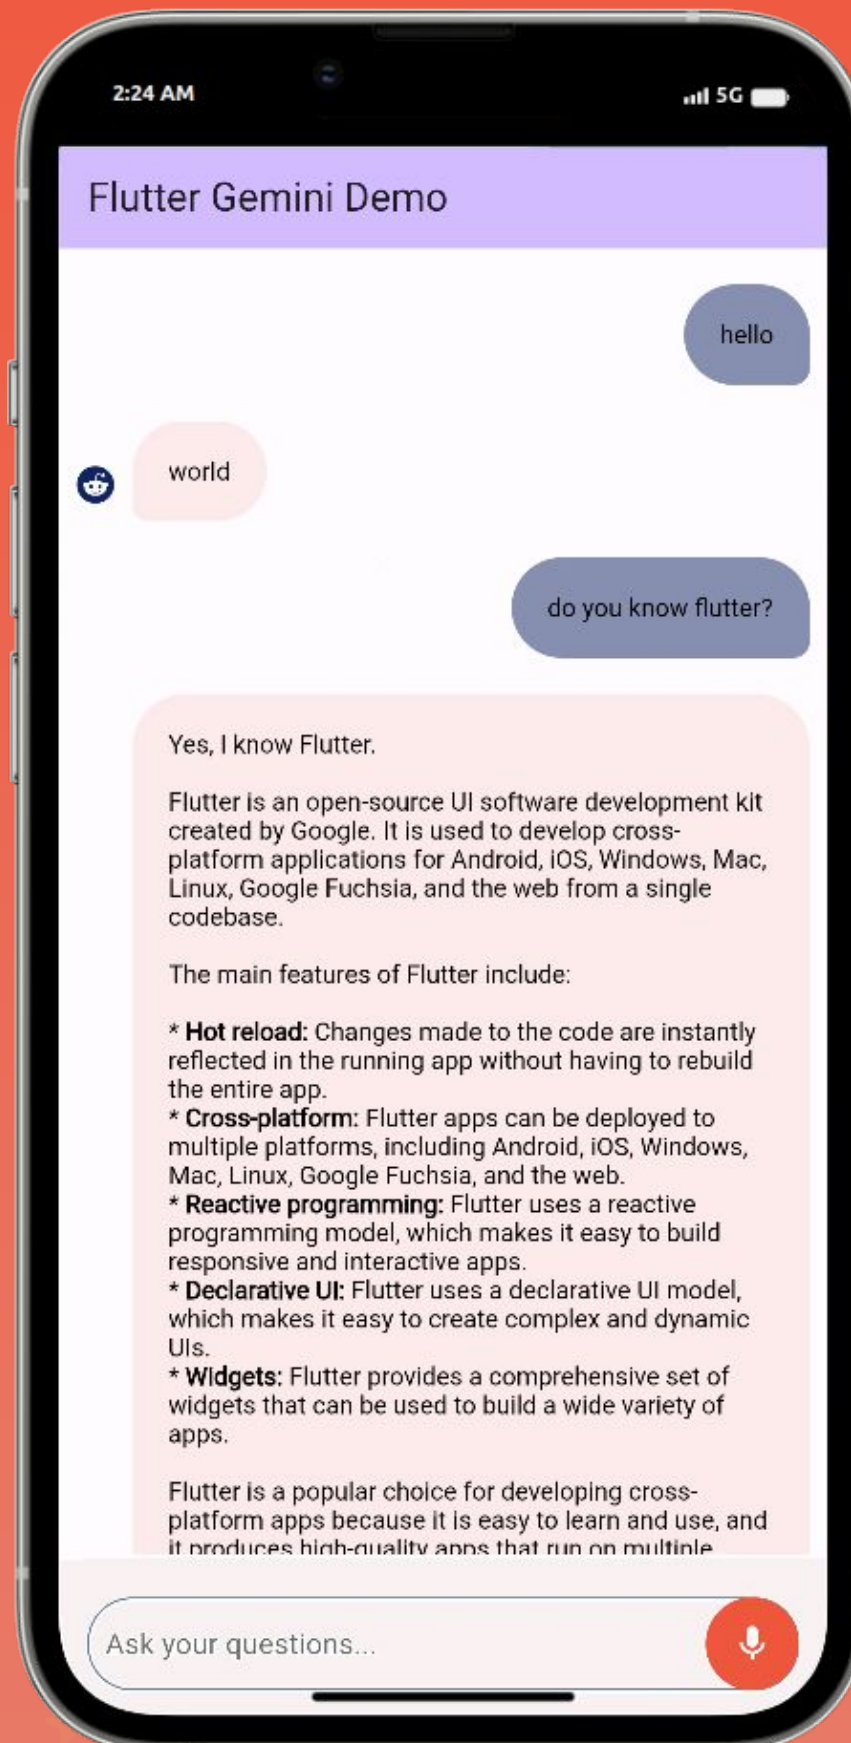

Example of using the package

```
class MyHomePage extends StatefulWidget {  
  @override  
  State<MyHomePage> createState() => _MyHomePageState();  
}  
  
class _MyHomePageState extends State<MyHomePage> {  
  List<ChatModel> chatList = [];  
  String apiKey = '[YOUR API KEY]';  
  
  @override  
  Widget build(BuildContext context) {  
    return Scaffold(  
      body: FlutterGeminiChat(  
        chatContext: 'example_context',  
        chatList: chatList,  
        apiKey: apiKey,  
      ),  
    );  
  }  
}
```
