

5 Practical CSS Tricks For Developers

Swipe 🗑 to check them out

Handle text overflow

```
Chrissy Browns
Senior Software Developer | Mark...
Online
```

```
.text {
  overflow: hidden;
  white-space: nowrap;
  text-overflow: ellipsis;
}
```

Applying shadows

```
.container {
   /* box-shadow: offsets blur color; */
  box-shadow: 0 0 5px rgba(0, 0, 0, 0.2);
   /* offsets = horizontal, vertical */
}
```

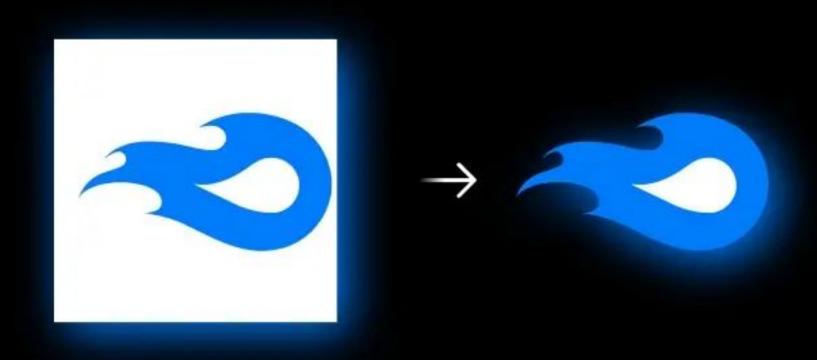

Using SVG inside <i> tag

Transparent image shadows

```
.shadow {
  filter: drop-shadow(10px 10px 50px #007BFA);
}
```

Simple perfect <button>

Simple

```
button {
  background: linear-gradient(to right, #2e95ff, #0061c6);
  color: white;
  border: none;
  font: 400 2rem system-ui;
  padding: 15px 30px;
  border-radius: 10px;
  cursor: pointer;
}
button:hover {
  background: #0053A8;
}
```
