# Random facts

This is a cool API. It is really useful when the user is looking at a loading screen and you can display a fact while the screen is loading.

## Facts API

Home / API Directory / Facts API

### Random Facts API

A full fledged facts API, one of the best in the world. Get random facts based on a category, drawn from hundreds of thousands of fact entries in our database. To provide finer granularity subcategory is also supported. You can store private facts and retrieve them back. On this day style historic facts are supported too.

To see some of the facts in our database you can look at our random facts generator here.

### API End Points

The end point for connecting : If you subscribe directly from us use this endpoint.
